Dear Hiring Manager,

I am writing to apply for the **SOC Analyst L2** position at your organisation. I have **3.3 years** of enterprise SOC experience in security monitoring, threat detection, threat hunting, and incident response. During my time at Securado Pvt Ltd, I supported security operations for **12 SIEM** customers and **34 EDR** customers across endpoint, network, and email security environments.

My experience includes alert triage, incident investigation, log correlation, IOC analysis, threat hunting, detection rule tuning, and incident response, including containment, remediation, recovery, and root cause analysis. I have worked with security platforms and tools such as **FortiSIEM, ArcSight, Splunk, Elastic, Elastic Defend, SentinelOne, Cortex XSOAR, Wireshark, Zeek, and Tenable Nessus**. I also have experience with phishing and malware investigations, network traffic analysis, and digital forensics using tools such as **Autopsy, KAPE, Volatility, and Velociraptor**.

Alongside my professional experience, I have built and maintained a **hands-on cybersecurity HOME LAB**, where I have deployed, configured, and implemented **Elastic SIEM and Elastic Defend** for security monitoring and threat detection. I have completed **20+ hands-on cybersecurity projects** covering Linux and Windows threat hunting, phishing investigations, and Splunk-based threat detection. These projects involved analysing security logs, investigating suspicious activity, identifying indicators of compromise, and detecting potential threats.

I have also earned **50+ cybersecurity credentials**, completed **512+ TryHackMe rooms**, achieved a position in the **top 1% of the TryHackMe leaderboard**, and published **30+ technical security write-ups**. These activities help me strengthen my investigation skills and stay engaged with practical security challenges.

I am looking for an opportunity to contribute my SOC experience, analytical skills, and hands-on knowledge to a security team. I would welcome the opportunity to discuss how my experience in threat detection, incident investigation, and defensive security operations could support your organisation.

Thank you for considering my application. I look forward to hearing from you.

.

Sincerely,
Kiran Dikshit Menon A
