Dear Hiring Manager,

I am writing to apply for the **SOC Analyst** position. I bring **3.3 years** of hands-on experience in security operations, with experience in security monitoring, incident response, threat hunting, malware analysis, phishing investigations, vulnerability assessment, and detection improvement.

In my previous role at **Securado**, I supported security operations across **12 SIEM customers** and **34 EDR customers**, working with **FortiSIEM**, **ArcSight**, **SentinelOne**, and **Cortex XSOAR**. My work included **alert investigation**, **incident handling**, **threat hunting**, **log correlation**, **detection rule tuning**, **IOC analysis**, **endpoint investigations**, and handling incidents from initial triage through remediation.

Alongside my professional experience, I have developed hands-on skills with **Splunk** and **ELK Stack** through independent threat-hunting practice and security labs.

I also have hands-on experience with **MITRE ATT&CK**, **Threat Intelligence**, **OSINT**, **Nessus**, **DFIR tools**, and **ISO 27001**. Outside of my professional experience, I continue building my technical skills through **TryHackMe**, **Hack The Box**, **security labs**, **CTFs**, and **cybersecurity research**.

I am interested in this opportunity because it aligns well with my experience in security monitoring, threat detection, incident response, and threat hunting. I believe my hands-on experience across multiple security environments, combined with my practical approach to investigation and continuous learning, would allow me to contribute effectively to your security operations team.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and skills can contribute to your organization.

Sincerely,
