Dear Hiring Manager,

I am excited to apply for the SOC Analyst position. With 3.4 years of experience in Security Operations, I have worked across security monitoring, incident response, threat hunting, malware analysis, phishing investigations, and detection engineering. My experience includes working with FortiSIEM, Splunk, ArcSight, SentinelOne, Elastic Defend, Cortex XSOAR, and the MITRE ATT&CK framework to investigate threats and strengthen security operations.

What drives me most is solving security problems and continuously learning. Beyond my professional experience, I actively enhance my skills through TryHackMe, Hack The Box, technical blogging, certifications, and personal security labs. These activities have helped me stay current with evolving threats and sharpen my practical cybersecurity skills.

I enjoy working in collaborative environments where I can investigate incidents, improve detection capabilities, automate repetitive tasks, and contribute to building a stronger security posture. I believe my hands-on SOC experience, technical curiosity, and commitment to continuous improvement would allow me to make a meaningful contribution to your team from day one.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and enthusiasm for cybersecurity align with your organization's goals.

Sincerely,
